A00034 ROV Accessories-Thruster Guard-PR2

Constructed of marine-grade materials, the thruster guard is designed to fit over the front, rear and vertical ROV thruster housings, and is locked in place by four threaded bolts and fasteners. Installation of thruster guards minimizes potential damage as the guards shield the thrusters from large pieces of debris being drawn in to the rotating blades as the ROV is in motion.

Key Features

Designed, engineered and manufactured on-site, MarineNav ROV accessories are hand-assembled to exacting standards.

- Manufactured from marine-grade materials with all necessary fasteners
- Integrated design provides quick and easy installation requiring a minimum of tools
- Sold as individual units, or in full sets

** Thruster Guards are sold as a ROV thruster accessory. ROV thruster assembly, thruster fairing, or thruster cowling parts not included.*
